PHP

Work Experience

Back-end Developer at Langue Maternel LM

March, 2022 - Present

LM is a project to develop a web and mobile platform for learning African mother tongues. The technologies used are the Django-Python framework for the backend (me) and React for the front-end, Adobe xd for the design.

Analysis & UML Design at library management system project

January, 2020 - March, 2020

The LMS project was a big project to pool all the libraries of the universities of Cameroon. And I took charge with my teams of the analysis and the design of this system

Junior Web Developer at IFOSSA project

Jan, 2011 - May, 2013

User generated content in real-time will have multiple touchpoints for offshoring. Organically grow the holistic world view of disruptive innovation via workplace diversity and empowerment.

Education

Bachelor's degree in digital systems engineering from UIECC-ESIGN

2020 - 2023

Overcoming the difficulties faced by African countries in education and internet access has allowed me to become one of the best in the field.

Bachelor of Science and Mathematics from Sangmelima Classical and Modern High School

2012 - 2019

User generated content in real-time will have multiple touchpoints for offshoring. Organically grow the holistic world view of disruptive innovation via workplace diversity and empowerment.
